

5 REASONS to Hire a Licensed DRONE PILOT

1 FAA COMPLIANCE

When you hire a commercial drone pilot, they have a responsibility to follow the rules. A licensed drone pilot will know where, when and how high they can fly.

2

2 SAFETY

It's one thing to put a drone in the air. It's another thing to do it safely. Licensed drone pilots spend hours learning FAA regulations – rules that were put in place to keep both people and air space safe.

3 LIABILITY INSURANCE

By their nature, drones present a risk to people on the ground and property. Hiring a licensed and insured drone pilot ensures you're covered if anything happens—something most recreational operators simply can't meet.

4 PROFESSIONALISM

Delivering high-quality aerial footage is FORTHGEAR's priority, because our reputation is on the line and your project truly matters.

5 ABOVE AND BEYOND

In addition to logistics, there is a creative aspect to every photography and videography project. A professional drone operator will factor in the entire scope of the project so clients end up with footage they love.
